WORK EXPERIENCE

Lead Frontend Developer
Northcott Global Solutions, London   **Contract ● 01/2023 – 02/2024**

A company that specialises in providing bespoke risk management and emergency services globally.
Tech: React.js, TypeScript, TailwindCSS, React Query, Google Maps API, OAuth2 and Adobe XD.

- Developed a data-driven monolithic application that empowered clients to effectively navigate potential threats while providing life-critical emergency services.
- Reduced development time by 25% by building reusable hooks and components.
- Collaborated with two frontend developers, organising virtual and in-person meetings to discuss feature improvements and resolve bugs.
- Improved stability by vigorously testing and optimising features.
- Actively involved in being familiar with backend to make small changes resulting in quicker debugging and feature release.

Frontend Developer
Plume, Bristol   **Contract ● 06/2022 – 11/2022**

An agency crafting learning management system for leading e-learning providers to build a more efficient and scalable solutions.
Tech: React.js, TypeScript, SCSS, Axios, GSAP, JWT, and Redux

- Directly impacted over a million students globally by building an e-learning platform.
- Worked closely with designers to bring creative concepts to life and collaborate with QA to resolve issues.
- Continuously improved by leveraging internal resources and staying up to date with industry trends.
- Improved user experience by implementing gamification resulting in better engagement.
